

Barclays Bank PLC – Dubai Branch Pillar 3 Report

For the period ended 30 June 2026

Table of Contents

1. Introduction	2
1.1. Overview of Basel III requirements	3
1.2. Basis of Preparation	3
1.3. Preparation and Approval	3
2. Overview of risk management and RWA	4
2.1. Key metrics (KM1)	4
2.2. Overview of RWA (OV1)	8
3. Composition of capital	9
3.1. Composition of regulatory capital (CC1)	10
3.2. Reconciliation of regulatory capital to balance sheet (CC2)	15
3.3. Reconciliation of regulatory capital to balance sheet (CC2)	16
4. Macro prudential Supervisory measures	18
4.1. Geographical distribution of credit exposures used in the countercyclical buffer (CCyB)	18
5. Leverage ratio	19
5.1. Leverage ratio common disclosure template (LR2)	19
6. Liquidity	21
6.1. Liquidity Coverage Ratio (LIQ1)	21
6.2. Eligible Liquid Assets Ratio (ELAR)	21
6.3. Advances to Stable Resource Ratio (ASRR)	22
7. Credit Risk	23
7.1. Credit quality of assets (CR1)	23
7.2. Changes in the stock of defaulted loans and debt securities (CR2)	27
7.3. Standardised approach - credit risk exposure and CRM effects (CR4)	28
7.4. Standardised approach - exposures by asset classes and risk weights (CR5)	29
8. Market Risk	30
8.1. Market risk under the standardised approach (MR1)	30

1. Introduction

Barclays Bank UAE, incorporated in 1975 in the UAE, is a full branch of Barclays Bank PLC (the Group). It has a restricted wholesale banking license and is regulated by the Central Bank of the UAE (CBUAE), while the Head Office (BBPLC) is regulated by the Prudential Regulation Authority (PRA) and the Financial Conduct Authority (FCA). The frameworks, policies, standards and procedures of Barclays Group are applied consistently across its operating businesses and subsidiaries, amended where necessary to ensure compliance with local regulatory requirements.

Barclays Corporate Banking is operating in the UAE with the following set-up:

- Barclays offers onshore transaction banking products (i.e., Cash Management, Overdrafts, Trade & Working Capital and FX) in foreign and local (AED) currencies.
- Debt Finance products (i.e., long term debt and revolving credit facilities) are booked and serviced out of Barclays offices in the UK and UAE.
- Corporate Banking clients are serviced by Barclays Bank UAE through teams based in UAE and is supplemented by support from other Barclays' offices.
- Focus is on a select client portfolio that is aligned to the global Corporate Banking client strategy.

The registered office and the address of the Bank is Barclays, Office 109, Level 1, The Offices 3, One Central, Dubai World Trade Centre, P.O.Box, 1891, Dubai, United Arab Emirates

The Pillar 3 disclosures reflect the activities of the branch in the United Arab Emirates only and exclude all transactions, assets and liabilities of the head office and its other branches elsewhere.

1.1. Overview of Basel III requirements

The Basel III framework implemented in the Bank is made up of three pillars.

- Pillar 1: Minimum Capital Requirements - This Pillar includes the calculation of RWAs for credit risk including counterparty credit risk, market risk and operational risk.
- Pillar 2: Supervisory Review and Evaluation Process (SREP) – This Pillar covers the consideration of whether additional capital is required over and above the Pillar 1 risk calculations. A firm’s own internal models and assessments support this process.
- Pillar 3: Market Discipline – This Pillar covers external communication of risk and capital information by banks as specified in the Basel rules to promote transparency and good risk management.

1.2. Basis of Preparation

The purpose of this public disclosure is to provide detailed information on Barclays Bank Plc, UAE Branch (herein also referred to as the 'Bank') capital structure, capital adequacy, risk exposure and risk-weighted assets (“RWA”), leverage ratio and liquidity ratios as of 30 Jun 2026.

The following public disclosure presents the annual Pillar 3 disclosure of Barclays Bank UAE which has been prepared in accordance with the Central Bank of UAE “Standards and Guidance re Capital Adequacy in the UAE”, Reference to Notice CBUAE/BSD/2022/5280 dated 30 December 2022 and Explanatory notes updated date 09 May, 2022 (Notice No. : CBUAE/BSN/2022/1887), as applicable to branches of foreign banks with total RWA of less than AED 5 billion.

The Pillar 3 Disclosure document has been prepared and presented using local currency – UAE Dirhams (AED’000).

1.3. Preparation and Approval

- The Pillar 3 report inputs are reviewed and approved by the respective functions i.e. Financial Control and Treasury.
- The Country Manage/COO and CFO review and approve the final report prior to publication.

2. Overview of risk management and RWA

2.1. Key metrics (KM1)

The objective of below table is to provide an overview of bank's prudential regulatory metrics, which covers the key prudential metrics related to regulatory capital, leverage ratio and liquidity standards. Accordingly, the Bank has disclosed all applicable metric values using the standards specified for the reporting period.

Barclays Bank UAE capital and leverage position is managed within the risk appetite framework. Barclays Bank UAE is subject to regulatory capital standards issued by Central Bank of UAE. The bank manages its balance sheet proactively, with a particular focus on the efficient management of RWA. LCR and NSFR reporting is not applicable for Barclays Bank UAE. Only banks selected by Central Bank, are able to use the LCR and NSFR for regulatory compliance. Due to the decline of HQLA balances (Physical cash in hand at the bank, balances with the CBUAE,) by 8% (AED 118 m) and increase in total liabilities by 25% (AED 799 m) over the quarter, the Eligible Liquid Assets Ratio declined to 34.11% in Jun 26 vs 46.48% in Mar 26. Advances to Stables Resource Ratio is at 67.46% in Jun 26 vs 50.54% in Mar 26, due to 46% increase in advances (AED 1.19 b) against 9% increase in stable funding (AED 479 m). RWAs has declined by 14% (AED 479 m) during the quarter with same capital and this caused the increase of the CAR ratio to 93.91% from 80.48% in Mar 26. Barclays Bank UAE is not highly leveraged, with a leverage ratio of 29.94%, well above the minimum leverage ratio requirement of 3%.

		Jun-26	Mar-26	Dec-25	Sep-25	Jun-25
SI No.	Available capital (amounts)	AED (000)	AED (000)	AED (000)	AED (000)	AED (000)

26	Advances to Stable Resources Ratio (%)	67.46%	50.54%	47.53%	53.29%	48.35%

* ELAR and ASRR are quarter end numbers as submitted to the UAE Central Bank.

2.2. Overview of RWA (OV1)

The purpose of this metrics is to provide an overview of total risk weighted assets.

		RWA	RWA	Minimum Capital Requirement
		30-Jun-26	31-Mar-26	30-Jun-26
		AED (000)	AED (000)	AED (000)
1	Credit risk (excluding counterparty credit risk)	2,380,290	2,853,381	299,605
2	Of which: standardised approach (SA)	2,380,290	2,853,381	299,605
3				
4				
5				
6	Counterparty credit risk (CCR)	3,786	6,269	658
7	Of which: standardised approach for counterparty credit risk	3,786	6,269	658
8				
9				
10				
11				
12	Equity investments in funds - look-through approach	-	-	-
13	Equity investments in funds - mandate-based approach	-	-	-
14	Equity investments in funds - fall-back approach	-	-	-
15	Settlement risk	-	-	-
16	Securitisation exposures in the banking book	-	-	-
17				
18	Of which: securitisation external ratings-based approach (SEC-ERBA)	-	-	-
19	Of which: securitisation standardised approach (SEC-SA)	-	-	-
20	Market risk	1,920	5,120	538

21	Of which: standardised approach (SA)	1,920	5,120	538
22				
23	Operational risk	483,161	483,161	50,732
24				
25				
26	Total (1+6+10+11+12+13+14+15+16+20+23)	2,869,157	3,347,932	351,533

The credit risk items have two main contributors: banks (AED 1,293 m) and corporate including GREs (AED 1,059 m) and other assets (mainly prepaid expenses AED 28 m).

Market risk is defined as the risk of losses in on and off-balance sheet positions arising from movements in market prices. The risks subject to this requirement are:

- The risks pertaining to interest rate related instruments and equities in the trading book.
- Foreign exchange risk and commodities risk throughout the bank

Operational risk is calculated by the Standardized Approach (SA).

During the quarter the operational risk remains same as the earlier quarter.

3.1. Composition of regulatory capital (CC1)

This template provides the breakdown of the constituent elements of a bank's capital.

		Amount AED (000)	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation
	Common Equity Tier 1 capital: instruments and reserves		
1	Directly issued qualifying common share (and equivalent for non-joint stock companies) capital plus related stock surplus	2,540,214	Same as (h) from CC2 template
2	Retained earnings	-78,806	
3	Accumulated other comprehensive income (and other reserves)	233,121	
4	<i>Directly issued capital subject to phase-out from CET1 (only applicable to non-joint stock companies)</i>	-	
5	Common share capital issued by third parties (amount allowed in group CET1)	-	
6	Common Equity Tier 1 capital before regulatory deductions	2,694,529	
	Common Equity Tier 1 capital regulatory adjustments		
7	Prudent valuation adjustments	-	
8	Goodwill (net of related tax liability)	-	CC2 (a) minus (d)
9	Other intangibles including mortgage servicing rights (net of related tax liability)	-	CC2 (b) minus (e)
10	Deferred tax assets that rely on future profitability, excluding those arising from temporary differences (net of related tax liability)	-	
11	Cash flow hedge reserve	-	
12	Securitisation gain on sale	-	
13	Gains and losses due to changes in own credit risk on fair valued liabilities	-	
14	Defined benefit pension fund net assets	-	
15	Investments in own shares (if not already subtracted from paid-in capital on reported balance sheet)	-	
16	Reciprocal cross-holdings in CET1, AT1, Tier 2	-	
17	Investments in the capital of banking, financial and insurance entities that are outside the scope of regulatory consolidation, where the bank does not own more than 10% of the issued share capital (amount above 10% threshold)	-	

		Amount AED (000)	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation
18	Significant investments in the common stock of banking, financial and insurance entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	
19	Deferred tax assets arising from temporary differences (amount above 10% threshold, net of related tax liability)	-	
20	Amount exceeding 15% threshold	-	
21	Of which: significant investments in the common stock of financials	-	
22	Of which: deferred tax assets arising from temporary differences	-	
23	CBUAE specific regulatory adjustments	-	
24	Total regulatory adjustments to Common Equity Tier 1	-	
25	Common Equity Tier 1 capital (CET1)	2,694,529	
Additional Tier 1 capital: instruments			
26	Directly issued qualifying Additional Tier 1 instruments plus related stock surplus	-	CC2 (i)
27	Of which: classified as equity under applicable accounting standards	-	
28	Of which: classified as liabilities under applicable accounting Standards	-	
29	<i>Directly issued capital instruments subject to phase-out from additional Tier 1</i>	-	
30	Additional Tier 1 instruments (and CET1 instruments not included in row 5) issued by subsidiaries and held by third parties (amount allowed in AT1)	-	
31	<i>Of which: instruments issued by subsidiaries subject to phase-out</i>	-	
32	Additional Tier 1 capital before regulatory adjustments	-	

		Amount AED (000)	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation
	Additional Tier 1 capital: regulatory adjustments		
33	Investments in own additional Tier 1 instruments	-	
34	Investments in capital of banking, financial and insurance entities that are outside the scope of regulatory consolidation	-	
35	Significant investments in the common stock of banking, financial and insurance entities that are outside the scope of regulatory consolidation	-	
36	CBUAE specific regulatory adjustments	-	
37	Total regulatory adjustments to additional Tier 1 capital	-	
38	Additional Tier 1 capital (AT1)	0	
39	Tier 1 capital (T1= CET1 + AT1)	2,694,529	
	Tier 2 capital: instruments and provisions		
40	Directly issued qualifying Tier 2 instruments plus related stock surplus	-	
41	<i>Directly issued capital instruments subject to phase-out from Tier 2</i>	-	
42	Tier 2 instruments (and CET1 and AT1 instruments not included in rows 5 or 30) issued by subsidiaries and held by third parties (amount allowed in group Tier 2)	-	
43	<i>Of which: instruments issued by subsidiaries subject to phase-out</i>	-	
44	Provisions	-	
45	Tier 2 capital before regulatory adjustments	-	

		Amount AED (000)	Source based on reference numbers/lette rs of the balance sheet under the regulatory scope of consolidation
	Tier 2 capital: regulatory adjustments		
46	Investments in own Tier 2 instruments	-	
47	Investments in capital, financial and insurance entities that are outside the scope of regulatory consolidation, where the bank does not own more than 10% of the issued common share capital of the entity (amount above 10% threshold)	-	
48	Significant investments in the capital, financial and insurance entities that are outside the scope of regulatory consolidation (net of eligible short positions)	-	
49	CBUAE specific regulatory adjustments	-	
50	Total regulatory adjustments to Tier 2 capital	-	
51	Tier 2 capital (T2)	-	
52	Total regulatory capital (TC = T1 + T2)	2,694,529	
53	Total risk-weighted assets	2,869,157	
	Capital ratios and buffers		
54	Common Equity Tier 1 (as a percentage of risk-weighted assets)	93.91%	
55	Tier 1 (as a percentage of risk-weighted assets)	93.91%	
56	Total capital (as a percentage of risk-weighted assets)	93.91%	
57	Institution specific buffer requirement (capital conservation buffer plus countercyclical buffer requirements plus higher loss absorbency requirement, expressed as a percentage of risk-weighted assets)	2.56%	
58	Of which: capital conservation buffer requirement	2.50%	
59	Of which: bank-specific countercyclical buffer requirement	0.06%	
60	Of which: higher loss absorbency requirement (e.g. DSIB)	-	
61	Common Equity Tier 1 (as a percentage of risk-weighted assets) available after meeting the bank's minimum capital requirement.	83.41%	

		Amount AED (000)	Source based on reference numbers/let ters of the balance sheet under the regulatory scope of consolidation
	The CBUAE Minimum Capital Requirement		
62	Common Equity Tier 1 minimum ratio	7.00%	
63	Tier 1 minimum ratio	8.50%	
64	Total capital minimum ratio	10.50%	
	Amounts below the thresholds for deduction (before risk weighting)		
66	Significant investments in common stock of financial entities	-	
68	Deferred tax assets arising from temporary differences (net of related tax liability)	-	
	Applicable caps on the inclusion of provisions in Tier 2		
69	Provisions eligible for inclusion in Tier 2 in respect of exposures subject to standardised approach (prior to application of cap)	-	
70	Cap on inclusion of provisions in Tier 2 under standardised approach	-	
	Capital instruments subject to phase-out arrangements (only applicable between 1 Jan 2018 and 1 Jan 2022)		
73	<i>Current cap on CET1 instruments subject to phase-out arrangements</i>	-	
74	<i>Amount excluded from CET1 due to cap (excess over cap after redemptions and maturities)</i>	-	
75	<i>Current cap on AT1 instruments subject to phase-out arrangements</i>	-	
76	<i>Amount excluded from AT1 due to cap (excess after redemptions and maturities)</i>	-	
77	<i>Current cap on T2 instruments subject to phase-out arrangements</i>	-	
78	<i>Amount excluded from T2 due to cap (excess after redemptions and maturities)</i>	-	

3.2. Reconciliation of regulatory capital to balance sheet (CC2)

This template enables users to identify the differences between the scope of accounting consolidation and the scope of regulatory consolidation, and to show the link between a bank's balance sheet in its published financial statements and the numbers that are used in the composition of capital disclosure template set out in Template CC1.

This template is not applicable for Barclays Bank UAE as of 30 June 2026, as we prepare, audit and publish the Financial Statements only on a yearly basis.

3.3. Reconciliation of regulatory capital to balance sheet (CC2)

Disclosures

The Bank operates as a branch of foreign bank in the UAE and share capital is composed only of the funding from the head office.

		Quantitative / qualitative information
1	Issuer	Not Applicable
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	
3	Governing law(s) of the instrument	
	Regulatory treatment	
4	Transitional arrangement rules (i.e. grandfathering)	
5	Post-transitional arrangement rules (i.e. grandfathering)	
6	Eligible at solo/group/group and solo	
7	Instrument type (types to be specified by each jurisdiction)	
8	Amount recognised in regulatory capital (currency in millions, as of most recent reporting date)	
9	Nominal amount of instrument	
9a	Issue price	
9b	Redemption price	
10	Accounting classification	
11	Original date of issuance	
12	Perpetual or dated	
13	Original maturity date	
14	Issuer call subject to prior supervisory approval	
15	Optional call date, contingent call dates and redemption amount	
16	Subsequent call dates, if applicable	
	Coupons / dividends	
17	Fixed or floating dividend/coupon	
18	Coupon rate and any related index	
19	Existence of a dividend stopper	
20a	Fully discretionary, partially discretionary or mandatory (in terms of timing)	
20b	Fully discretionary, partially discretionary or mandatory (in terms of amount)	
21	Existence of step-up or other incentive to redeem	
22	Non-cumulative or cumulative	
23	Convertible or non-convertible	
24	Writedown feature	
25	If writedown, writedown trigger(s)	
26	If writedown, full or partial	

		Quantitative / qualitative information
27	If writedown, permanent or temporary	Not Applicable
28	If temporary write-own, description of writeup mechanism	
28 a	Type of subordination	
29	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument in the insolvency creditor hierarchy of the legal entity concerned).	
30	Non-compliant transitioned features	
31	If yes, specify non-compliant features	

4. Macro prudential Supervisory measures

4.1. Geographical distribution of credit exposures used in the countercyclical buffer (CCyB)

This template provides an overview of the geographical distribution of private sector credit exposures relevant for the calculation of the countercyclical buffer.

	a	b	c	D	e
Geographical breakdown	Countercyclical capital buffer rate	Exposure values and/or risk-weighted assets used in the computation of the countercyclical capital buffer		Bank-specific countercyclical capital buffer rate	Countercyclical buffer amount
		Exposure values (AED'000)	Risk-weighted assets (AED'000)		
UAE	0.00%	2,341,031	660,030	0.00%	-
Switzerland	0.00%	238,745	91,825	0.00%	-
Germany	0.75%	15,000	2,057	0.00%	0.03
Ireland	1.50%	75,000	8,168	0.01%	0.94
Kuwait	0.00%	1,686,052	3,818	0.00%	-
Luxembourg	0.50%	168,531	101,746	0.05%	48.50
Netherlands	2.00%	4,000	155	0.00%	0.00
Sweden	2.00%	45,305	1,759	0.00%	0.06
United States	0.00%	1,687,743	197,778	0.00%	-
Singapore	0.00%	110,190	0	0.00%	-
Total		6,371,597	1,067,336	0.06%	684.9575

5. Leverage ratio

5.1. Leverage ratio common disclosure template (LR2)

This template provides a detailed breakdown of the components of the leverage ratio denominator, as well as information on the actual leverage ratio, minimum requirements, and buffers.

		Jun-26	Mar-26	Dec-25	Sep-25	Jun-25
		AED (000)	AED (000)	AED (000)	AED (000)	AED (000)
On-balance sheet exposures						
1	On-balance sheet exposures (excluding derivatives and securities financing transactions (SFTs), but including collateral)	6764283	5940001	6296988	7364843	6511102
2	Gross-up for derivatives collateral provided where deducted from balance sheet assets pursuant to the operative accounting framework	-	-	-	-	-

6. Liquidity

6.1. Liquidity Coverage Ratio (LIQ1)

Bank is using the alternative approach for Liquidity Coverage Ratio (LCR) as per the provisions in Liquidity Risk regulation of CBUAE (2015), i.e., Eligible Liquid Assets Ratio (ELAR) hence it is not applicable.

6.2. Eligible Liquid Assets Ratio (ELAR)

Quantitative disclosures

This template presents the breakdown of a bank's available high-quality liquid assets (HQLA), as measured and defined according to the CBUAE Liquidity Regulations.

The ratio remains comfortably above the minimum requirement of 10%.

1	High Quality Liquid Assets	Nominal amount	Eligible Liquid Asset (AED 000)
1.1	Physical cash in hand at the bank + balances with the CBUAE	3,321,769	
1.2	UAE Federal Government Bonds and Sukuks	-	
	Sub Total (1.1 to 1.2)	3,321,769	3,321,769
1.3	UAE local governments publicly traded debt securities	-	
1.4	UAE Public sector publicly traded debt securities	-	
	Sub Total (1.3 to 1.4)	0	0
1.5	Foreign Sovereign debt instruments or instruments issued by their respective central banks	-	0
1.6	Total	3,321,769	3,321,769
2	Total liabilities		4,263,210
3	Eligible Liquid Assets Ratio (ELAR)		0.78

ELAR is calculated as simple average of the daily balances over the period of Q2 26.

6.3 Net Stable Funding Ratio (LIQ2)

Bank is using the alternative approach for Net Stable Funding Ratio (NSFR) as per the provisions in Liquidity Risk regulations of CBUAE (2015), i.e., Advances to Stable Resources Ratio (ASRR) hence it is not applicable.

6.3. Advances to Stable Resource Ratio (ASRR)

This template presents the breakdown of a bank's advances to Stables Resource ratio as per the Liquidity regulations.

		Items	Amount
1		Computation of Advances	(AED 000)
	1.1	Net Lending (gross loans - specific and collective provisions + interest in suspense)	1,880,517
	1.2	Lending to non-banking financial institutions	0
	1.3	Net Financial Guarantees & Stand-by LC (issued - received)	276,809
	1.4	Interbank Placements	709,575
	1.5	Total Advances	2,866,902
2		Calculation of Net Stable Resources	
	2.1	Total capital + general provisions	2,764,821
		Deduct:	
	2.1.1	Goodwill and other intangible assets	0
	2.1.2	Fixed Assets	1,093
	2.1.3	Funds allocated to branches abroad	0
	2.1.5	Unquoted Investments	0
	2.1.6	Investment in subsidiaries, associates and affiliates	0
	2.1.7	Total deduction	1,093
	2.2	Net Free Capital Funds	2,763,728
	2.3	Other stable resources:	
	2.3.1	Funds from the head office	0
	2.3.2	Interbank deposits with remaining life of more than 6 months	0
	2.3.3	Refinancing of Housing Loans	0
	2.3.4	Borrowing from non-Banking Financial Institutions	1,382,391
	2.3.5	Customer Deposits	1,038,628
	2.3.6	Capital market funding/ term borrowings maturing after 6 months from reporting date	0
	2.3.7	Total other stable resources	2,421,019
	2.4	Total Stable Resources (2.2+2.3.7)	5,184,746
3		Advances TO STABLE RESOURCES RATIO (1.6/ 2.4*100)	55.29

The above represents simple average of three monthly ASRR returns submitted to CBUAE in Q2 2026.

7. Credit Risk

7.1. Credit quality of assets (CR1)

The principal objective of credit risk measurement is to produce the most accurate possible quantitative assessment of the credit risk to which the Bank is exposed, from the level of individual facilities up to the total portfolio. Integral to this is the assignment of obligor ratings, which are used in numerous aspects of credit risk management and in the calculation of regulatory and economic capital.

The key building blocks in this quantitative assessment are:

- Probability of default (PD)
- Exposure at default (EAD)
- Loss given default (LGD)

Balances as on 30 June 2026

	a	b	c	d	e	f
	Gross carrying values of		Allowances/Impairments	provisions for credit losses on SA exposures		Net values (a+b-c)
	Defaulted exposures	Non-defaulted exposures		Allocated in regulatory category of Specific	Allocated in regulatory category of General	
Loans	30,742.00	6,733,645.00	68,280.00	30,742.00	37,538.00	6,696,107.00
Debt securities	0.00	0.00	0.00	0.00	0.00	0.00
Off-balance sheet exposures	0.00	2,975,134.00	2,501.00	0.00	2,501.00	2,972,633.00
Total	30,742.00	9,708,779.00	70,781.00	30,742.00	40,039.00	9,668,740.00

Loans-

As of June 2026, the gross carrying value of defaulted exposures remained unchanged compared to the levels reported in December 2025.

Meanwhile, the gross carrying value of non-defaulted exposures increased by AED 467 million to AED 6,733 million, from AED 6,267 million reported in December 2025. This movement was primarily driven by an increase in bank exposures of AED 759 million, an increase in exposures to government-related entities of AED 275 million and an increase in corporate exposures of AED 16m, partially offset by a decrease in overdraft facilities/placements with the UAE sovereign of AED 591 million.

Off Balance Sheet Exposures -

As of June 2026, exposures under the non-defaulted off-balance sheet book, excluding undrawn uncommitted exposures, increased by AED 238 m to AED 2,975 m, from AED 2,737 m in Dec 2025.

Impairments-

Provisions increased by AED 4 m to AED 71 m as of June 2026, from AED 67 m in Dec 2025. This increase was driven by a rise in risk-weighted credit assets (CRWA), which led to a corresponding increase in general provisions.

Definition of Default

The definition of default has been aligned to the Regulatory Capital CRR Article 178 definition of default (the obligor is considered unlikely to pay its credit obligations to Barclays in full without recourse to actions such as the realisation of collateral, (UTP). The obligor is more than 90days past due on any material credit obligation to Barclays, (90dpd)) which considers indicators that the debtor is unlikely to pay, which includes exposures where financial concessions have been granted and is no later than when the exposure is more than 90 days past due. When exposures are identified as credit impaired or purchased or originated as such interest income is calculated on the carrying value net of the impairment allowance.

The Bank's definition of default is consistent with the provisions of CBUAE Circular 28/2010 (Regulation for Classification of Loans and their Provisions).

Within the Wholesale portfolios, the Basel definitions of default are used as default indicators. A default is deemed to have occurred with regards to a particular obligor if one or both of the following applies:

the obligor is considered unlikely to pay its credit obligations to Barclays in full without recourse to actions such as the realisation of collateral

the obligor is 90 days or more past due on any material credit obligation to Barclays

Examples of unlikeliness to pay include:

- the Group puts the credit obligation on a non-accrued status
- the Group makes a charge-off or account specific identified impairment resulting from a significant perceived decline in credit quality
- the Group sells the credit obligation at a material credit-related economic loss

- the Group triggers a petition for obligor's bankruptcy or similar order
- the Group becomes aware of the obligor having sought or having been placed in bankruptcy or similar protection where this would avoid or delay repayment of the credit obligation to the Group
- the Group becomes aware of an acceleration of an obligation by a firm ▪ where the obligor is a bank – revocation of authorisation
- where the obligor is a sovereign – trigger of default definition of an approved External Credit Assessment Institution (ECAI) such as a rating agency

The DPD methodology requires the need to differentiate and understand the difference between a past due and breach:

Past due:

- Refers to any credit obligation that has not been paid at the date it was contractually due, specifically a past due commences from the date at which:
 - a payment was contractually due and has not been made; or
 - the facility expiry date has passed with a debit balance still outstanding; or
 - for overdrafts and other 'revolving credit' facilities, an obligor has breached the assigned limit, has been advised a limit smaller than the current outstanding balance, or has drawn an exposure without authorisation; or
 - for recourse factoring and purchased receivables: when the factoring account is in debit, i.e. from when the advances paid for the receivables exceed the percentage agreed with the obligor; or
 - for non-recourse factoring and purchased receivables: when the payment for a single receivable becomes due. In the specific case of undisclosed arrangements, past due commences from the moment when payments made by the debtor to the obligor should be paid across to Barclays
- Past due status is measured at the facility level, with credit obligations treated consistently irrespective of how the indebtedness is incurred, i.e. principal, interest or fees
- Where contractual terms and conditions allow the obligor to modify, restructure or suspend payments under defined conditions, and such terms are exercised, the exposure is not considered past due. In such circumstances, the counting of DPD is assessed relative to the

revised contractual payment schedule once it is formally amended on the source booking system

Breach:

- Breach is a regulatory capital concept and occurs when aggregate past due(s) to an obligor have exceeded both materiality thresholds
- Breach status is measured at the obligor level, defined as being all entities within a Grade as Group (GAG) or Grade as Intermediate Group (GAIG) arrangement
- The number of days in breach is measured by the number of consecutive days an obligor's aggregate past dues have exceeded both materiality thresholds, irrespective of how many days underlying past dues have been outstanding ("Continuous Count" is where past dues cross and you have younger past dues than the breach itself)
- Breach start date re-assessed (Breach reassessment) if:
 - Change in GAG or GAIG structure, then the materiality thresholds are applied backdated on the new GAG or GAIG structure. The breach start date is adjusted to reflect the number of consecutive days the new GAG or GAIG past dues have exceeded both the thresholds
 - Removed technical past due(s) originated before the remaining non-technical past dues, then the breach start date is adjusted to reflect the number of consecutive days the remaining non-technical past dues have exceeded both the thresholds
- A breach is closed when one of the following occurs:
 - The underlying past due(s) are resolved and remediated to be back in order on the source system(s)
 - One or both materiality thresholds are not exceeded in the daily calculation
 - One or more past dues are determined to be technical in nature and material enough to close the breach when removed from the next day's threshold calculation

7.2. Changes in the stock of defaulted loans and debt securities (CR2)

		As of 30 Jun 2026 (AED '000)
1	Defaulted loans and debt securities at the end of the previous reporting period (as at 31 Dec 2025)	30,742
2	Loans and debt securities that have defaulted since the last reporting period	-
3	Returned to non-default status	-
4	Amounts written off	-
5	Other changes	-
6	Defaulted loans and debt securities at the end of the reporting period (1+2-3-4±5)	30,742

During the reporting period, defaulted loans remained unchanged.

7.3. Standardised approach - credit risk exposure and CRM effects (CR4)

This template illustrates the effect of CRM (comprehensive and simple approach) on standardised approach capital requirements' calculations. RWA density provides a synthetic metric on riskiness of each portfolio.

	Asset classes	Exposures before CCF and CRM		Exposures post-CCF and CRM		RWA and RWA density	
		On-balance sheet amount	Off-balance sheet amount	On-balance sheet amount	Off-balance sheet amount	RWA	RWA density
1	Sovereigns and their central banks	3,020,413	0	3,020,413	0	0	0%
2	Public Sector Entities	839,791	373,032	839,791	55,160	425,133	48%
3	Multilateral development banks	0	0	0	0	0	0%
4	Banks	2,614,421	5,312,516	2,614,421	942,790	1,293,125	36%
5	Securities firms	0	0	0	0	0	0%
6	Corporates	226,601	3,210,929	226,601	645,198	633,935	73%
7	Regulatory retail portfolios	0	0	0	0	0	0%
8	Secured by residential property	0	0	0	0	0	0%
9	Secured by commercial real estate	0	0	0	0	0	0%
10	Equity Investment in Funds (EIF)	0	0	0	0	0	0%
11	Past-due loans	0	0	0	0	0	0%
12	Higher-risk categories	0	0	0	0	0	0%
13	Other assets	32,419	0	32,419	0	28,097	87%
14	Total	6,733,645.00	8,896,477.00	6,733,645.00	1,643,148.00	2,380,290	28%

The RWA density of 28% is calculated as total risk-weighted assets (RWA) divided by total exposures after the application of credit conversion factors (CCF) and credit risk mitigation (CRM), including sovereign exposures. Risk-weighted assets (RWA) decreased by AED 21 million to AED 2,380 million as of June 2026, compared with AED 2,401 million reported in December 2025. This reduction was primarily driven by a decrease in corporate RWA associated with off-balance sheet products (AED 31 million) and a reduction in bank RWA (AED 3.8 million), partially offset by an increase in RWA for government-related entities (GREs) of AED 8.8 million.

7.4. Standardised approach - exposures by asset classes and risk weights (CR5)

This template presents the breakdown of credit risk exposures under the standardised approach by asset class and risk weight (corresponding to the riskiness attributed to the exposure according to standardised approach).

		a	b	c	d	e	f	g	h	i
Risk weight		0%	20%	35%	50%	75%	100%	150%	Others	Total credit exposures amount (post CCF and post-CRM)
Asset classes										
1	Sovereigns and their central banks	3,020,413	0	0	0	0	0	0	0	3,020,413
2	Public Sector Entities		587,272	0	0	0	307,679	0		894,951
3	Multilateral development banks	0	0	0	0	0	0	0	0	0
4	Banks	55,201	1,700,773	0	1,696,535		104,703	0	0	3,557,211
5	Securities firms	0		0	0	0	0	0	0	0
6	Corporates	88,104	0	0	299,521	0	484,174	0	0	871,799
7	Regulatory retail portfolios	0	0	0	0	0	0	0	0	0
8	Secured by residential property	0	0	0	0	0	0	0	0	0
9	Secured by commercial real estate	0	0	0	0	0	0	0	0	0
10	Equity Investment in Funds (EIF)	0	0	0	0	0	0	0	0	0
11	Past-due loans	0	0	0	0	0	0	0	0	0
12	Higher-risk categories	0	0	0	0	0	0	0	0	0
13	Other assets	6,267	5,809	0	0	0	15,948	0	4,395	32,419
14	Total	3,169,985	2,293,854	0	1,996,056	0	912,504	0	4,395	8,376,793

Total credit exposures increased by AED 625 million as of June 2026 compared with December 2025. The increase was primarily driven by higher exposures to banks (AED 1,024 million), government-related entities (GREs) (AED 229 million), and other assets (AED 7 million). These increases were partially offset by a reduction in sovereign exposures of AED 592 million, which are risk-weighted at 0%, and a decrease in corporate exposures of AED 44 million.

8. Market Risk

8.1. Market risk under the standardised approach (MR1)

This table provides the components of the capital requirement under the standardised approach for market risk.

		RWA AED ('000)
1	General Interest rate risk (General and Specific)	-
2	Equity risk (General and Specific)	-
3	Foreign exchange risk	1,920
4	Commodity risk	-
	Options	
5	Simplified approach	-
6	Delta-plus method	-
7		
8	Securitisation	-
9	Total	1,920
